# Rythmik Love

## Biography

Lee is self taught and writes and mix / masters all songs from FL Studio , his influences range from bands like Pink Floyd to heavy metal, with little real Pop music influence until 2008, due to this he has used FL Studio to overcome as much of the learning curve as possible, releasing several demo's of songs before "officially" releasing anything, he is steadily growing in skill and also blogs( [rythmiklove.blogspot.com/](http://rythmiklove.blogspot.com/) ) and reviews music in his spare time (mainly in the [mymusicstream.com](http://mymusicstream.com) community)

Amie records with Rode Mic's Exclusively (NT1-A) and is only new to the song writing process, but coming along quite quickly, she has sung since an early age, and spent many nights performing Karaoke in pubs and clubs when younger.

She always loved singing Britney Spears, Jessica Simpson, Tina Arena, Madonna, Celine Dion, Mariah Carey and Mandy Moore and won the odd competition or even a free drink for her Mum now and then.

As she got older she strayed from singing full time and her voice has suffered for it, she's practicing steadily as Lee gets ready to setup a soundproof booth for a better (noiseless) recording environment, meaning the songs will be retouched one last time for the real vocals to be laid down (it's going to be impressive so keep watching this site.

For a tiny (5`6) girl she can really sing!!!!!!

They may (if copyright bla allows it) release a couple Cover songs of some of her favourite artists to show her vocal range while Lee learns to write different styles of music to accompany the many songs Amie has ready to record.

They don't play live at the moment due to wanting to practice to perfection, transport issues or at least carrying lighter gear (laptop for instance) and seting up a better system for real-time vocal performance (latency issues)

Previous Work:

[soundclick.com/infinityindecadence](http://soundclick.com/infinityindecadence) <-Lee's solo work from 2006 to 2008, featuring ambient electronica, soundscapes,

classical sonic madness, techno, trance and some other random music.

<http://www.myspace.com/intestinaldamage> <- Metal band from 2005, Lee wrote and produced the songs.

Don't forget to signup as a fan, it only takes 30 seconds! and we regularly update our material! Our EP is for sale for \$3.69 AUD but you can download the songs seperately for free! (See Music page)
